

# **5th Belle II Starter Kit Workshop**

## **Report of Contributions**

Contribution ID: 5

Type: **not specified**

## What is PXD

**Session Classification:** Lectures

Contribution ID: 6

Type: **not specified**

## What is SVD

**Session Classification:** Lectures

Contribution ID: 7

Type: **not specified**

## What is CDC

**Session Classification:** Lectures

Contribution ID: 8

Type: **not specified**

## How do we find tracks

**Session Classification:** Lectures

Contribution ID: 9

Type: **not specified**

## How do we define kinematics

**Session Classification:** Lectures

Contribution ID: **10**

Type: **not specified**

## **Introduction to b2bii**

**Session Classification:** Lectures

Contribution ID: **11**

Type: **not specified**

## **What is ECL**

**Session Classification:** Lectures

Contribution ID: 12

Type: **not specified**

## What is KLM

**Session Classification:** Lectures

Contribution ID: 13

Type: **not specified**

## What are TOP and ARICH

**Session Classification:** Lectures

Contribution ID: 14

Type: **not specified**

## What is combined PID

**Session Classification:** Lectures

Contribution ID: 15

Type: **not specified**

## **On reproducibility of analysis**

**Session Classification:** Lectures
