

# Format of the CFR-Teams

- How many researchers?
  - Examples in the application vary between 4 and 9
- How to embed efficiently young scientists?
  - Examples in the application list mainly PIs
- How to incorporate external partners in the most efficient way?
- How to incorporate collab with other research areas within CMF?

# Initial Suggestions...

- How many researchers?
  - Pairs: at least experiments represented, or experiment + theory, theory + theory
- How to embed efficiently young scientists?
  - Make them part of the cross-functional teams which should meet regularly
- How to incorporate external partners in the most efficient way?
  - Work will be on-going as a part of the cross-functional teams, but we should also make connection from within RA2 structures
- How to incorporate collab with other research areas within CMF?
  - Via conveners...
