

# **2020 Belle II Physics Week**

Monday, 30 November 2020 - Friday, 4 December 2020

## **Book of Abstracts**

# Contents

Introduction to amplitude analyses . . . . .	1
Semileptonic B decays (1) . . . . .	1
Amplitude analysis theory . . . . .	1
Semileptonic B decays (2) . . . . .	1
Free . . . . .	1
Tau amplitude analyses (1) . . . . .	1
How to build an amplitude model . . . . .	1
Experimental considerations on amplitude analyses . . . . .	1
Tau amplitude analyses (2) . . . . .	2
Snowmass White Papers . . . . .	2
Using MC truth matching in basf2 . . . . .	2
Including systematic uncertainties in upper limit calculations . . . . .	2
SuperKEKB status and prospects . . . . .	2
Strong phase difference between $D^0$ and $D^0\bar{}$ $\rightarrow K_S/L \pi^+ \pi^-$ and the role of model-dependent inputs at BESIII . . . . .	2
Tests of CPT symmetry in the neutral-meson systems . . . . .	3
Analysis of $\tau \rightarrow \eta \pi \nu_\tau$ in Belle using B2BII . . . . .	3
Introduction . . . . .	3
Discussion . . . . .	3

**Lecture / 2**

## **Introduction to amplitude analyses**

**Corresponding Author:** [jonas.rademacker@bristol.ac.uk](mailto:jonas.rademacker@bristol.ac.uk)

**Lecture / 4**

## **Semileptonic B decays (1)**

**Lecture / 5**

## **Amplitude analysis theory**

**Corresponding Author:** [c.hanhart@fz-juelich.de](mailto:c.hanhart@fz-juelich.de)

**Lecture / 6**

## **Semileptonic B decays (2)**

**Corresponding Author:** [kerivos@gmail.com](mailto:kerivos@gmail.com)

**Lecture / 8**

## **Free**

**Lecture / 10**

## **Tau amplitude analyses (1)**

**Corresponding Author:** [epassema@indiana.edu](mailto:epassema@indiana.edu)

**Lecture / 11**

## **How to build an amplitude model**

**Corresponding Author:** [jonas.rademacker@bristol.ac.uk](mailto:jonas.rademacker@bristol.ac.uk)

**Lecture / 12**

## **Experimental considerations on amplitude analyses**

**Corresponding Author:** t.j.gershon@warwick.ac.uk

**Lecture / 15**

## **Tau amplitude analyses (2)**

**Corresponding Author:** epassema@indiana.edu

**Introduction / 18**

## **Snowmass White Papers**

**Corresponding Author:** thomas.browder@desy.de

**Topical seminar / 19**

## **Using MC truth matching in basf2**

**Corresponding Author:** frank.meier@desy.de

**Topical seminar / 20**

## **Including systematic uncertainties in upper limit calculations**

**Corresponding Author:** diego.tonelli@desy.de

**Topical seminar / 21**

## **SuperKEKB status and prospects**

**Corresponding Author:** kyo.shibata@kek.jp

**Informal session / 22**

## **Strong phase difference between $D_0$ and $D_0^{\text{bar}}$ $\rightarrow$ $K_S^0/L$ $\pi^+$ $\pi^-$ and the role of model-dependent inputs at BESIII**

**Corresponding Author:** anita.lavania@physics.iitm.ac.in

**Informal session / 23**

## **Tests of CPT symmetry in the neutral-meson systems**

**Corresponding Author:** [agrober@indiana.edu](mailto:agrober@indiana.edu)

**Informal session / 24**

## **Analysis of tau $\rightarrow$ eta pi nu\_tau in Belle using B2BII**

**Corresponding Author:** [michel.hernandez.villanueva@desy.de](mailto:michel.hernandez.villanueva@desy.de)

**Introduction / 29**

## **Introduction**

**Corresponding Author:** [alessandro.gaz@desy.de](mailto:alessandro.gaz@desy.de)

**Lecture / 30**

## **Discussion**
