ISU KLM Meeting
October 25

SBC Software: ethernet network

- Can communicate via ssh over the local ethernet network
  - Uses IP address
    - scp file.txt lab_comp@[lab computer IP address]:/home/bubbler_archive
  - Generate keys to avoid needing passwords for ssh
  - Is this a reasonable way to do this communication?

SBC Software: data output

- If we use ssh, we can use rsync
  - Compares two directories and copies files one way
  - Include this command in a bash script on the Pi
