

TRG DQM for CR shifter
2023/2/9
T.Koga

New TRG DQM for CR shifter

-DQM group plan to update DQM for CR shifter

-simple interface for easy understanding

-https://indico.belle2.org/event/8390/contributions/50931/attachments/20239/29955/dqm_tb_13_1_2023.pdf

-TRG would like to show following information for CR shifter

-two main plots:

- ①trigger efficiency
- ②trigger timing (event t0)

-variables from DQM histogram and indicator with error threshold:

- 1. mean of L1 timing difference between GDL and FE
- 2-4. mean of ECLTRG,CDCTRG,TOPTRG event timing with hadronic event
- 5-8. peak position of ECLTRG,CDCTRG,TOPTRG,KLMTRG latency on GRL
- 9-12. mean of hadron/Bhabha, hadronb2/Bhabha, mumu/Bhabha, gg/Bhabha
- 13. a flag which shows if there is zero entry bin in ECLTRG Hit TC ID
- 14. a flag which shows if there is zero entry bin in CDCTRG wire ID
- + KLMTRG, TOPTRG related plots (not decided yet), maybe more

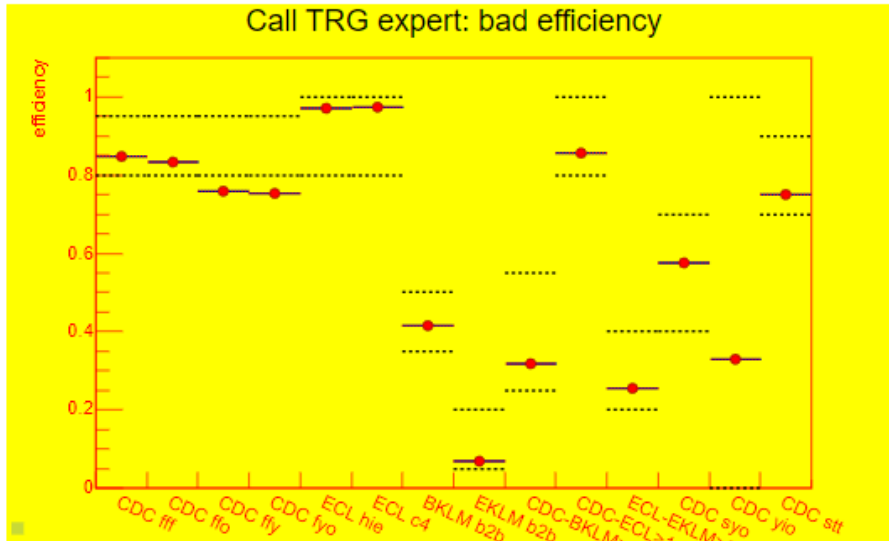

TRG main plot

-Main plot:

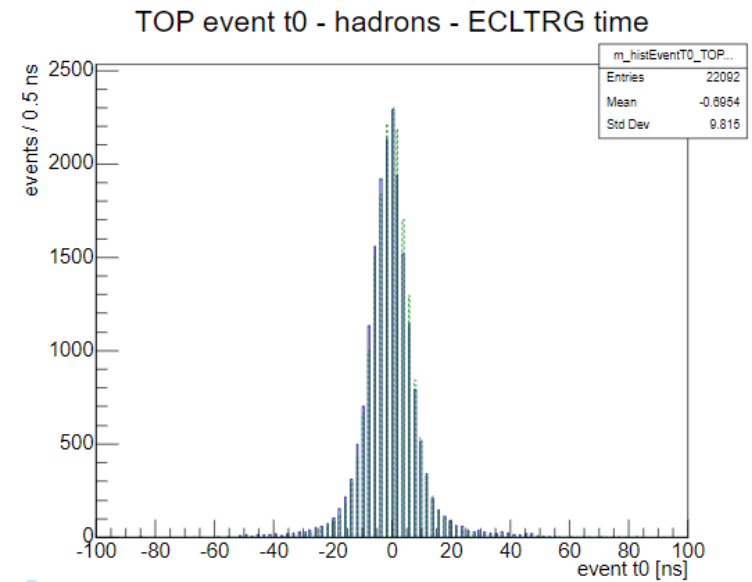

-①trigger efficiency

-②eventT0

①

②

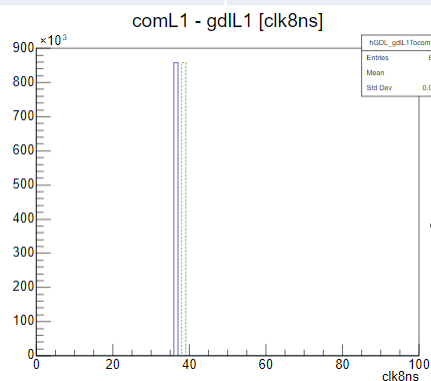

variables with error indicator

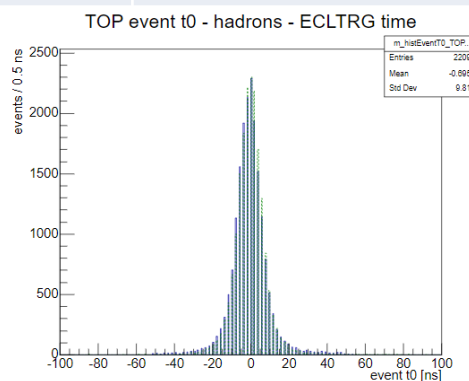

-Variables with error threshold

number	variable	value from histogram	error threshold
1	comL1-GDLL1	mean	[36,38] clk
2-4	eventT0	mean	[-5,5] ns
5-8	Subtrigger Latency	peak	subtrigger dependent
9-12	#skim ratio	#entry ratio in each bin	skim dependent
13	ECLTRG deadch	#entry in each bin	all bins have #entry > 0
14	CDCTRG deadch	#entry in each bin	~90% bins have #entry > 0

Summary

-TRG would like to show following information for CR shifter

-two main plots:

- ①trigger efficiency
- ②trigger timing (event t0)

-variables from DQM histogram and indicator with error threshold:

- 1. mean of L1 timing difference between GDL and FE
- 2-4. mean of ECLTRG,CDCTRG,TOPTRG event timing with hadronic event
- 5-8. peak position of ECLTRG,CDCTRG,TOPTRG,KLMTRG latency on GRL
- 9-12. mean of hadron/Bhabha, hadronb2/Bhabha, mumu/Bhabha, gg/Bhabha
- 13. a flag which shows if there is zero entry bin in ECLTRG Hit TC ID
- 14. a flag which shows if there is zero entry bin in CDCTRG wire ID
- + KLMTRG, TOPTRG related plots (not decided yet), maybe more

-We will prepare any needed technical information in detail

-what information is needed ?

backup

New DQM for CR shifter

- DQM group plan to update DQM for CR shifter
- simple interface for easy understanding

-https://indico.belle2.org/event/8390/contributions/50931/attachments/20239/29955/dqm_tb_13_1_2023.pdf

- include 2/3 main plots
- with "details" open detector dedicated page
- allow flexible size of histograms
- include run dependency plots from MiraBelle?
(alt. make MiraBelle summary page and display it at all times on another display)
- display numbers
(inc. default values, easy to change by exp. shifter)
- display alarms from not-shown histograms
- require active participation from the shifters

-We prepare our 1st proposal for TRG

- 2 or 3 main plots
- variables from DQM histogram and indicator with error threshold
